

CLAIMS

What is claimed is:

1. A method for analyzing content on a web page comprising:
5 accessing said web page comprising content;
 processing the web page through a filter wherein the filter transfers the
content of the web page to an analyzer;
 analyzing the content of the web page at said analyzer;
 returning a result of said analyzing to said server;
10 appending the result of said analyzing to the content of said web page;
 and
 displaying said web page and said result.
2. The method as recited in Claim 1 wherein said accessing said web page
15 comprising content is performed by an application server operating on a first
computing system.
3. The method as recited in Claim 2 wherein said filter is a function of
the application server.
20
4. The method as recited in Claim 2 wherein said server and said filter
operate on said first computing system.

5. The method as recited in Claim 2 wherein said analyzer operates on a second computing system that is communicatively coupled with said first computing system.

5 6. The method as recited in Claim 1 wherein said analyzer analyzes said content of said web page for compliance with section 508 of the Rehabilitation Act.

7. The method as recited in Claim 1 wherein said filter transfers content
10 of the web page to the analyzer in a hypertext mark-up language (HTML) format.

8. The method as recited in Claim 1 wherein said content of said web page is secure.

15

9. A computer system comprising:
a bus;
a memory unit coupled with said bus; and
a processor coupled with said bus, said processor for executing a method
20 for analyzing content on a web page comprising:
receiving a request for a web page;
generating a web page on a server;
processing the web page through a filter wherein the filter
transfers content of the web page to an analyzer, said analyzer analyzing

the content of the web page and returning a result of said analyzing to said server; and

appending the result of said analyzing to the content of said web page.

5

10. The computer system of Claim 9 wherein said server is an application server operating on a first computing system.

11. The computer system of Claim 10 wherein said filter is a function of the application server.

12. The computer system of Claim 10 wherein said server and said filter operate on said first computing system.

13. The computer system of Claim 12 wherein said request for said web page is generated by a browser operating on said first computing system.

14. The computer system of Claim 10 wherein said analyzer operates on a second computing system that is communicatively coupled with said first computing system.

15. The computer system of Claim 9 wherein said analyzer analyzes said content of said web page for compliance with section 508 of the Rehabilitation Act.

25

16. The computer system of Claim 9 wherein the filter transfers content of the web page to the analyzer in a hypertext mark-up language (HTML) format.

5 17. A computer-usable medium having computer-readable program code embodied therein for causing a computer system to perform a method for analyzing content on a web page, said method comprising:

 accessing said web page comprising content;

 processing the web page through a filter wherein the filter transfers the

10 content of the web page to an analyzer;

 analyzing the content of the web page at said analyzer;

 returning a result of said analyzing to said server;

 appending the result of said analyzing to the content of said web page;

 and

15 displaying said web page and said result.

 18. The computer-usable medium of Claim 17 wherein said generating of a web page comprising content is performed by an application server operating on a first computing system.

20

 19. The computer-usable medium of Claim 17 wherein said filter is a function of the application server.

 20. The computer-usable medium of Claim 18 wherein said server and

25 said filter operate on said first computing system.

21. The computer-usable medium of Claim 18 wherein a request for said web page is generated by a browser operating on said first computing system.

5 22. The computer-usable medium of Claim 18 wherein said analyzer operates on a second computing system that is communicatively coupled with said first computing system.

23. The computer-usable medium of Claim 17 wherein said analyzer
10 analyzes said content of said web page for compliance with section 508 of the Rehabilitation Act.

24. The computer-usable medium of Claim 17 wherein the filter
transfers content of the web page to the analyzer in a hyper text mark-up
15 language (HTML) format.
